

Super S[®] Super Power Wash and Wax

Super S[®] Super Power Wash and Wax is a 2-in-1 wash and wax concentrate for use as a hand wash detergent that utilizes a unique Caranuba Wax emulsion to leave a waxed, shiny look on clear coat and other enamel surfaced cars, trucks, RVs, motorcycles, ATVs and more. The high friction detergent system gently penetrates and removes dirt, oil, grease, bug splatter, and road film from the vehicle's surface with minimum scrubbing keeping your car/truck looking "like new". Designed for use between regular waxing, **Super Power Wash and Wax** easily removes road grime and dirt, all while boosting your existing wax giving you that "just waxed" look and feel.

Super S[®] Super Power Wash and Wax uses a chemically engineered blend of high activity surfactants and alkali which create a robust, thick, dense lather that deep-cleans and conditions automotive finishes. Various dishwashing liquids and "soaps" can harm your auto-finish. The powerful, pH balanced blend of surfactants is strong enough to easily wash away typical road grime without removing wax or dulling the paint.

The Caranuba wax emulsion utilized in **Super Power Wash and Wax** contains flash-foam technology which promotes water sheeting that effectively breaks down and repels water promoting fast-drying action for a spot-free finish. Optical brighteners are included delivering deep shine and lasting protection for all paints and clear coats. Light buffing once completely dry will enhance shine giving the like new appearance.

Super S[®] Super Power automotive wash solutions are engineered to handle challenging cleaning conditions. Most operators are not aware of the complicated chemical reactions which take place throughout the cleaning process of automotive finishes. Identifying which variables are affecting your car wash is only half the battle. Common culprits, such as organic or inorganic soil, water quality, seasonal temperatures, severe weather changes, pollution, and road conditions can be overlooked. Each **Super Power** car wash product is optimized through a series of lab experiments and on-site tests followed by extensive field testing in a real-world environment to ensure maximum performance and protection is achieved.

Features

- Easily cuts through the most stubborn soils
- Dries to a bright finish with only light buffing
- Fast water sheeting for a spot-free finish
- Caranuba wax seals and protects for a longer lasting shine
- Excellent between wax maintenance for maintaining a bright, glossy finish
- Weatherproofs automotive surfaces
- Wax emulsion promotes faster drying times
- Excellent suds regeneration
- Environmentally friendly, biodegradable formula
- High lubricity for a slick finish that encapsulates grime and safely washes away for a scratch free finish
- Concentrated 2-in-1 formula reduces inventory and wash/wax time
- Optimized pH for safe hand washing
- Contains no solvents (VOC compliant)

SURFACE APPLICATIONS

For exterior washing/cleaning of clear coat, single stage, acrylic, lacquers, enamels, as well as powder-coated paints. Also cleans glass, chrome, plastic, vinyl, rubber, wheels, tires, and more.

Technical data on page 2

Super S[®] Super Power Wash and Wax

DIRECTIONS:

1. Hose off vehicle to remove loose dirt
2. Dilute at a rate of 2 oz. per gallon of water
3. Shampoo vehicle with a clean sponge, wash mitt, or other vehicle wash brush
4. Rinse thoroughly with a moderate stream of water
5. For a richer shine, lightly buff once completely dry

HELPFUL TIPS:

Use on cool surfaces. To quickly cool the surfaces, rinse entire vehicle with pressurized water before use. This will also help to loosen and remove dirt. It is best to use a separate wash mitt or sponge on the lower body areas, fender wells, wheels, and tires. This way, if you pick up any small rocks and dirt, it won't scratch the painted areas.

Typical Characteristics

<i>Properties</i>	<i>Typical Results</i>
Physical Form	Thick, water based liquid
pH	6.5-7.5
Color	Lime Green
Odor	Pleasant / Bubble Gum
Specific Gravity	1.02

Typical test data are average values only.
 Minor variations which do not affect product performance are to be expected during normal manufacturing.

SPECIAL HANDLING, NOTICES OR WARNINGS

Eyes: Completely flush for 15 mins with water occasionally lifting the upper and lower eye lids.
 Inhalation: Move exposed person to fresh air.
 Ingestion: Do not induce vomiting, call a physician immediately.
